

# SNOW & ICE REMOVAL

## Shovel Often and Early

Shoveling often during and immediately following the storm removes the snow from walkways and driveways before it gets packed down by tires and feet. The most important part of deicing is removing as much snow as possible before applying salt or sand - it's also great exercise!

For salt to be effective, air temperature needs to be warmer than the surface temperature of the area you want to treat. A little goes a long way.

**Renew Our Waters** *Every choice counts.*
