

UKG-ADD ICON TO DESKTOP

How to Add Icon for UKG to Desktop

[Log into UKG](#)

Rev: 10-2022

Go to the UKG Login screen-Highlight the website string URL...Right click and click copy.

Go to your desktop. Right Click in a clear area and hover over New and then click on shortcut. In the Type the location of the item box you need to right click and select paste. This should put the Kronos website URL in the box because you had copied it before.

<https://secure4.entertimeonline.com/ta/6155540.login>

Then click Next. In the Type a name for this shortcut box you can name it what you want. I would suggest Kronos-Workforce Ready. Then click Finish
