
Subject: Waldo Blvd Update 4/10/20

Hello all,

Here is a recap of what has happened lately:

- Underground utility work continues. Crews have installed water main from 14th St through 18th St. Sanitary sewer is completed from 14th through 17th St. Other spot repairs for each of those facilities have also been completed west of those segments.
- Crews started storm sewer near 14th St today, heading west with their progress.
- The crew on the bridge over the railroad continues to make progress. The entire existing bridge deck is now removed, and forming for pouring the new deck is progressing.
- At the box culvert, nearly half of the excavation is complete. This will be for the first phase of that work. Yesterday was our first concrete pour at that location.

Looking ahead for the next few weeks:

- Sanitary sewer work will continue west from 17th St. They will tie in to the existing sewer a few hundred feet west of 18th St. Additionally, there are a few spot repairs remaining.
- Water main work will continue west from 18th St. That work will continue to progress west to 23rd St.
- Storm sewer work will continue west from 14th Street. All new storm sewer will be placed along the project.
- Work on forming for the bridge deck will continue. It is anticipated that the new deck will be poured the first week in May.
- The box culvert excavation will continue tomorrow. Once that is completed, crews will be forming the base section. Concrete pours are expected approximately every third day.

Although the weather forecast has a few unknowns yet, if we do get significant snow this weekend, the contractor will be clearing the roadway so that you will have access to your house. Let's hope we don't have to deal with that though.

As always, thank you for your patience during construction. If you have any questions, comments, or concerns, please do not hesitate to contact me.

Thanks, and have a great weekend.
