

South Building

North Building

812 & 814 S 8th Street

ABOUT THE PROJECT

Originally built in the 1880s, support for these projects helped to restore them to the downtown gems they once were. Both buildings underwent significant updates to their overall façades to restore and protect them for years to come. Located in the heart of the downtown, the location will become prime residential & business spaces with amazing views of the waterfront.
